Interim Edition Oct, 1983

X-7231	MATCHBOX	REQ. 16K	$12.50

Similar to the well known childrens game, this computer version puts the emphasis on your ability to use your memory to play the game. The screen is divided into a number of 'covered' squares, under which is stored a symbol. The idea is to choose two squares under which the symbols match and the trick is to remember which squares contain what symbols. Two squares can be chosen for each turn however if the squares do not match, they are covered up again thus making the game more interesting.

X-7232	POKER	REQ. 8K	$12.50

Straight draw Poker. Just you and the computer in a face-off. As with normal Poker, you can bet, raise, call and even bluff and fold. Be warned though, the computer has the uncanny ability to know what cards you have simply by watching the expression on your face! As with the real game you can draw up to four cards but the secret is in knowing just what to throw away.

X-7233	HANGMAN	REQ. 16K	$12.50

Based on one of the world's most popular games, Hangman is not only fun but is educational too! Players have to guess the letters of a secret word of up to eight characters in length. Correct guesses will 'build' the word and give the player another chance however incorrect guesses can be fatal as you will see! You could get hung!

X-7234	SLOT MACHINE	REQ. 8K	$12.50

Your legs will probably get tired from standing in front of this one watching your money disappear. The odds are exactly the same as a real slot machine so you could just need a bucket to carry away your winnings!

X-7235	BLACKJACK	REQ. 16K	$12.50

Just like being in a casino! You'll need good nerves to beat the 'house' although this version is definitely more friendly. The idea is to obtain '21' (or as close to it as possible) from the cards and you will be shown all cards. The computer will show no favouritism in taking your money or those of the other three players who can accompany you on your trip to bankruptcy.

X-7236	CIRCUS	REQ. 8K	$12.50

Quick reflexes and planning are needed to be successful with this program. It tests your ability to control the two acrobats on a see-saw whose goal is to jump high enough to enable them to puncture the floating balloons. Sounds a little crazy, but a lot of fun and very challenging. Excellent graphics.

X-7237	BIORHYTHM	REQ. 16K	$12.50

For many years now, major science groups such as N.A.S.A. and huge oganisations such as the Tokyo Taxi Cab Co. have relied on biorhythm information for their staff. The program bases its information on your birthdate and calculates your physical, emotional and intellectual highs and lows for a given period thus being able give you valuable information on your health and fitness. A great entertainer as well as having the more serious application.

X-7239	VZ-INVADERS	REQ. 8K	$12.50

Just like the arcade favourite, this version will keep you very busy as you try to avoid the bombs from the invaders as they get ever closer. Only quick action will suffice in this game. Excellent graphics and good sound keep up the enjoyment.

X-7240	DYNASTY DERBY	REQ. 16K	$12.50

If you've ever wanted to go horse racing and couldn't afford to, then this program is for you. You line up the horses, check out the latest odds, place your bets and away you go. You'll need a little luck and just as a hint, it's not always the short odds horse that wins! Great graphics.

X-7241 LEARJET REQ. 16K $29.95

Ever fancied yourself as a pilot, winging your way through the blue beyond? Well, here's your chance. Slide into the seat and take the controls of this incredibly good simulation of the cockpit panel of a modern Learjet. Select your destination and course, set up the instruments, start your engines and taxi out to adventure. One point, engine failure is a constant threat, so be ready! Terriffic graphics and an excellent manual make this program very hard to beat for the enthusiast.

X-7242 VZ GHOST HUNTER REQ. 8K $12.50

Another incredibly good version of the arcade favourite. You'll be kept very busy as you try to avoid being eaten by the ghosts but don't forget, you've got four power pills per frame. Get to the power pills and turn the tables as you go ghost hunting. Incredibly good graphics and plenty of action will keep you busy for hours.

X-7243 HOPPY REQ. 16K $12.50

Another enjoyable arcade game, this version will make life hard for you (if you are a frog) as you try to weave your way through the high speed traffic. If you are fortunate enough to survive that, you then have to negotiate the river. Fortunately, you have logs and friendly turtles to help in your quest. One last problem awaits you at your destination. A roving alligator! Great graphics.

X-7244 SUPER SNAKE REQ. 8K $12.50

Quick response and the lightning ability to analyse the situation and make decisions will help to generate big scores for this unusual game. You are a snake and in order to grow you must seek the 'food' which appears randomly. As you eat, so your 'tail' will grow. The object of the game is to continue to be able to move around your area without either touching any part of your own tail or the walls. Four levels of play with nine speeds in each make this game a real challenge.

X-7251 STATISTICS I REQ. 8K $12.50

This mini-course will provide the user with both a theoretical and a practical course in statistics. It covers such areas as Mean Variance, Standard Deviation, Geometrical Mean and Deviation, Binomial Distribution and Poisson Distribution. The package utilises the teach and test method and is very easy to follow.

X-7252 STATISTICS II REQ. 16K $12.50

As above, this second section complements the first by adding more complex equations and introducing further material. It covers areas such Chi-Square Test, Linear Coefficient and Linear Regression.

X-7253 MATRIX REQ. 16K $12.50

This package is a powerful tool to allow the manipulation of data stored in arrays. It allows you to perform four separate functions at one time. You can add matrices, subtract matrices and multiply them by a scalar value or by another matrix. This program can save many hours of painstaking calculations and most importantly, do it right!

X-7254 GOLF LESSON REQ. 16K $12.50

Just like a real golf game, complete with the obstacles. This game will take you through a full 18 hole course but unlike other games, the computer is on your side. Each hole has a Par value and you can select from a full range of clubs. An added feature is that the computer will measure your putting stroke and give you a putt 'potency' index after the game.

X-7255 INTRODUCTION TO BASIC REQ. 16K $12.50

This program is broken up into six sections that will lead you through the mystical world of commands and statements used in BASIC. Each section will detail various commands and will show you how they are used. The program will also provide practical uses with a question and review section for each topic. Highly recommended for the beginner.

X-7256 ELEMENTARY GEOMETRY REQ. 16K $12.50

If you are weak in this vital subject, this program can provide valuable assistance. It covers all of the important equations used in geometry to provide you with a geometrical calculator.

X-7257 SPEED READING REQ. 16K $12.50

Reading skills are without doubt one of the most important skills that we can learn. This program helps by providing an easy-to-use method in which a story is displayed on the screen. You choose the time delay with which each line is removed and following total removal of the display, you will be asked a series of questions based on the story. Your score and averages will then be calculated. This is an excellent learning package and one that is highly recommended for those who need to improve their reading skills and level of comprehension.

X-7258 TYPING TEACHER REQ. 8K $12.50

This program is designed to provide a more than useful tool with which to improve your keyboard skills. A detailed display of the keyboard is provided on the screen and you are requested to press keys which will be displayed at random while a clock runs. You will be scored over a fixed time period and a determination made based on the number of keys pressed correctly. A program that will definitely improve your keyboard dexterity.

X-7261 PORTFOLIO MANAGEMENT REQ. 16K $12.50

Always wanted to be able to analyse the Stockmarket the way that your broker does? Here's your chance to do so! This program allows you to analyse your portfolio with a proven formula to minimise the risk for a given investment. It also allows you to maximise the return on a given risk. You can instantly determine the effects of diversification and their effects on your portfolio. You also have the ability to key in a particular stock and establish a number of 'most-efficient' distributions of that stock for your present or future portfolio.

X-7262 DISCOUNTED CASH FLOW MODEL REQ 8K $12.50

This program covers a widely used profesional tool for making capital budgeting decisions. The model allows you to calculate both Net Present Value and Internal Rate of Return for any manner of investment project. It can also provide information on where an overall budget can be reduced while maintaining project liquidity and it helps evaluate the overall project in terms of the most eficient on-going rate of return.

X-7263 FINANCIAL RATIO ANALYSIS REQ. 16K $12.50

This program performs a much needed business function. It has the capability to take keyed in data and to show the existing ratios in a number of useful ways. It can provide comparison analysis with the entire data stored or just within an individual sector. It also has the ability to determine up to 10 separate ratio calculations within the 4 categories of liquidity, leverage, management and profitability.

X-7280 HEX UTILITIES REQ. 8K $12.50

A program designed as an aid to those who need a little bit more from their system. The package provides useful conversion of decimal to hexidecimal, hex to decimal as well as other useful routines such as an ASCII memory dump.
