VZ-200 into puberty

Steve Olney has produced a machine code utility which "re-enables all 23 hidden commands resident in the VZ Basic ROM". Apparently this means VZ-200 will then have most of the Level II TRS-80 commands and a couple more. It'll set you back a moderate $15. Write to Steve Olney, 200 Terrace Road, North Richmond, 2754.
